Subject: About the Financial Support for our accepted IEEE Conference paper.

Sir,

With due respect, I am glad to share with you that our research paper titled “Improved Convolutional Neural Network and Transfer Learning with VGG16 Approach for Image Classification” under my supervision has been accepted for the 2023 International Conference on Innovation and Intelligence for Informatics, Computing, and Technologies (3ICT2023) by IEEE Bahrain Section, University of Bahrain, Bahrain for presentation. I have also four co-author of our research paper which is Habibullah, Md. Oli Ullah, Minhaz Kamal, Md. Sabbir Hasan Sohag. I need financial support for registration to attend and present it at IEEE Xplore Digital Library. I therefore kindly request that you provide me with financial support of **5,512 tk** to present our research at 3ICT2023. Please consider making a financial contribution to support our team. I have attached the accepted confirmation mail from 3ICT2023.

I therefore kindly request that you provide me with financial support of **5,512 tk** to present our research at 3ICT2023.

Sincerely Yours's

Md. Saifur Rahman

Chairman and Assistant Professor

Dept. of CSE

Bangladesh University of Business and Technology (BUBT)

Confirmation Email from 3ICT2023

3ICT2023 Review Decision For Your paper #1570941121 ('Improved Convolutional Neural Network and Transfer Learning with VGG16 Approach for Image Classification')

3ICT2023 <3ict2023-chairs@edas.info>

Thu, Sep 14, 11:26 AM (13 days ago)

to me, Oli, Minhaz, Sabbir, Saifur

Dear Mr. Habib Ullah:

Congratulations - your paper #1570941121 ('Improved Convolutional Neural Network and Transfer Learning with VGG16 Approach for Image Classification') has been accepted for presentation in the 2023 International Conference on Innovation and Intelligence for Informatics, Computing, and Technologies (3ICT). Your manuscript should be prepared as a two column pdf file without the page numbers using the standard IEEE 2-column paper format that can be found at: http://www.ieee.org/conferences_events/conferences/publishing/templates.html

Please note that according to IEEE xplore publishing Criteria: any paper with high similarity or excessive citation for the used references & self citation must be rejected.

The following information is provided to help you in publishing your final paper in the proceedings of 3ICT2023.

Please note that your manuscript will reviewed once more before submission to IEEEExplore, and will not publish your paper if the plagiarism is high in your paper and the PDF does not comply with the template instructions such as paper length, margins, and fonts embedding.

The due date for submitting the final version of your paper is October 15, 2023.

IEEE-Xplore-compatible PDF generation

The final paper must be converted into PDF with settings compliant with the requirements of the IEEE Xplore digital library. To this purpose, the IEEE PDF eXpress website web tool should be used. PDF files generated in a different way might not be IEEE Xplore-compliant and could be rejected.

The instructions to generate an IEEE-Xplore-compatible PDF file using the IEEE PDF eXpress web tool are listed below:

Create an IEEE PDF eXpress account using the conference ID (Will be provided in another email).

The first time you access IEEE PDFeXpress, please follow the link (<https://www.pdf-express.org/>) to "New Users".

1. Select the New Users - Click Here link.
2. Enter the following:
 - The Conference ID (Will be provided in another email)
 - your email address
 - a password
3. Continue to enter information as prompted.

An Online confirmation will be displayed and an email confirmation will be sent verifying your account setup.

After logging in, please upload the source files of your camera-ready paper for conversion (e.g. DOC, DOCX, TEX and so on). Alternatively, you can also just check the compliance of your generated PDF file.

After a few minutes, you will receive the IEEE-Xplore-compatible PDF version of your paper by e-mail. You have to submit the received IEEE-Xplore-compatible PDF through edas.

Please note that according to IEEE xplore publishing Criteria: any paper with high similarity or excessive citation for the used references & self citation

The following information is provided to help you in publishing your final paper in the proceedings of 3ICT2023.

Similar to the first paper submission, your final document will be checked to ensure that it meets all formatting and compatibility requirements to be included in a visually pleasing and IEEE Xplore-compliant proceedings. If we encounter errors in the appearance or compatibility of your document file, you will be contacted by email. Also, 3ICT2023 will not accept plagiarized content. This includes re-used content from an author's prior publication in a journal, conference proceeding. Kindly, refer to the reports available on EDAS in front of the Final manuscript row (Check format / Report problem) and resubmit your final manuscript, if needed.

The full reviews are below or can be found at <https://edas.info/showPaper.php?m=1570941121>, and it is given below:

===== Full Review 1 =====

> *** Strengths/Weakness: What are the major reasons to accept/reject the paper? [Be brief.]

-Recent topic
- the author written is very good

> *** Contribution/s & Detailed comments: What are the major issues addressed in the paper? Do you consider them important? Comment on the degree of novelty, creativity and technical depth in the paper. Please provide detailed comments that will be helpful to the TPC for assessing the paper, as well as feedback to the authors.

the paper is novel

> *** Originality: New or Novel contribution
Accept (8)

> *** Significance of Topic: Relating to knowledge contribution
Accept (8)

> *** Presentation: Clarity and Organisation of Content
Accept (8)

===== Full Review 2 =====

> *** Strengths/Weakness: What are the major reasons to accept/reject the paper? [Be brief.]

The paper described in detail the methodology, experiments, and analysis for improving the VGG16 model for classifying cats and dogs.

> *** Contribution/s & Detailed comments: What are the major issues addressed in the paper? Do you consider them important? Comment on the degree of novelty, creativity and technical depth in the paper. Please provide detailed comments that will be helpful to the TPC for assessing the paper, as well as feedback to the authors.

The paper addresses the performance of an improved cnn to classify cats and dogs. The experimental setup was described in detail and results were visualized using tables and charts to ease understanding. The proposed method was also compared with other methods. However, the conclusion could be rewritten to ease understanding of what is being discussed. Figure 4 on page 4 needs to be reduce as it covers the words on the left paragraph. Table III, typo - mathod.

===== Full Review 3 =====

> *** Strengths/Weakness: What are the major reasons to accept/reject the paper? [Be brief.]

The paper presents an exploration of Convolutional Neural Network and Transfer Learning with VGG16 Approach for Image Classification. The research questions are well-defined, and the methodology is sound, demonstrating a rigorous approach to data collection and analysis. The literature review effectively situates the study within the existing body of knowledge.

> *** Contribution/s & Detailed comments: What are the major issues addressed in the paper? Do you consider them important? Comment on the degree of novelty, creativity and technical depth in the paper. Please provide detailed comments that will be helpful to the TPC for assessing the paper, as well as feedback to the authors.

There are a few specific areas that require attention:

1. The structure of the paper could be refined for improved clarity and flow. Consider reorganizing sections to create a smoother narrative that guides the reader through your research process.
2. Provide additional context and interpretation for your results. Readers should be able to easily understand the implications of your findings and their significance in the broader research context.
3. Strengthen the theoretical discussion by connecting your findings to the theoretical methods. This will enhance the overall cohesion of your paper.

> *** Originality: New or Novel contribution
Weak Accept (6)

> *** Significance of Topic: Relating to knowledge contribution
Weak Accept (6)

> *** Presentation: Clarity and Organisation of Content
Weak Accept (6)

===== Full Review 4 =====

> *** Strengths/Weakness: What are the major reasons to accept/reject the paper? [Be brief.]

Nice Paper
Only check for grammars and typo error

> *** Contribution/s & Detailed comments: What are the major issues addressed in the paper? Do you consider them important? Comment on the degree of novelty, creativity and technical depth in the paper. Please provide detailed comments that will be helpful to the TPC for assessing the paper, as well as feedback to the authors.

Nice Paper

Only check for grammars and typo error

Accept (8)

> *** Presentation: Clarity and Organisation of Content
Accept (8)

===== Full Review 5 =====

> *** Strengths/Weakness: What are the major reasons to accept/reject the paper? [Be brief.]

The paper does a good work for image classification using transfer Learning with VGG16 and an improved convolutional neural network to classify the cat and dog images. The paper analyzes the proposed algorithm well.

> *** Contribution/s & Detailed comments: What are the major issues addressed in the paper? Do you consider them important? Comment on the degree of novelty, creativity and technical depth in the paper. Please provide detailed comments that will be helpful to the TPC for assessing the paper, as well as feedback to the authors.

The paper contains a good field in AI; CNN with transfer learning. But the data set can be more efficient to use as a useful application in our daily life. In what field can the classification of cat and dog images use? I suggest changing the data set to be more efficient and useful in our daily life. The paper is written in a highly technical way, also the references are used carefully. The article displayed very well but I have two comments: 1. the equations must be numbered and cited before written (like the figures and tables). 2. Second, figures (5,6,7, and 8) must have the caption of x and y axis's to be more clear to the reader.

> *** Originality: New or Novel contribution
Neutral (5)

> *** Significance of Topic: Relating to knowledge contribution
Neutral (5)

> *** Presentation: Clarity and Organisation of Content
Strong Accept (10)

Regards,
3ICT Chair
